

DELIVERED COURSE ADAPTATION

Psychological Practicum

Research methods, perception, experimental thinking, and scientific reporting.

Designed for adult professionals and curious learners. Original AdriaMont Institute material, adapted from expert teaching, research, and professional practice.

A practice-oriented course adaptation based on university teaching in psychological practicum, research methods, perception, experimental design, and reporting. The AdriaMont version focuses on usable research skills for adult learners.

STATUS	Delivered university course, adaptation possible
FORMAT	Applied digital course or methods lab
AUDIENCE	Early researchers, analysts, educators, psychology learners, evaluation teams
SOURCE BASE	University of Montenegro practicum lectures and research-reporting materials
PRIVACY ACTION	Student work, test keys, textbook scans, and third-party slide decks excluded

Source and privacy note: Only the course logic and original teaching expertise are used. Test items, answer keys, student materials, and third-party copyrighted resources are excluded.

Adapted module route

- 01 Psychological research logic: questions, variables, evidence, and inference.
- 02 Experimental design: manipulation, control, validity, and ethics.
- 03 Perception and attention as applied examples for research thinking.
- 04 Data collection and observation: quality, bias, and documentation.
- 05 Writing a research report: structure, evidence, tables, interpretation, and limitations.
- 06 From academic exercise to professional analysis: communicating findings clearly.

Reusable public materials

- Research question builder.
- Experiment planning worksheet.
- Research report structure template.
- Evidence interpretation checklist.

Request this course as a methods-and-reporting route for professionals who need stronger research literacy.
